Model 3200	No - Use Model 172 to design as it has the roughly the same boot panels for coloring	Included with price of boots

**ColorLab® Ordering Instructions:**

- Due to the amount of information needed, ALL ColorLab orders must be placed with Riedell Customer Serviced Representative by calling **800-698-6893**.
- Once in the ColorLab Online Application, select your boot model to start designing. Be sure to select all parts of the boot and choose your color. The default color in ColorLab is white.
- The application allows you to design your left and right boot differently. Be sure to design both the right and the left boot. You can choose to copy the same color scheme you designed on the left boot to the right by clicking **Copy Left To Right**.
- If your boot model is not available to design, like the Blue Streak or the Model 495, refer to the chart above and design your boot using the alternate model listed. When speaking with a Customer Service Rep, be sure to indicate the model that you want if different than the model shown in the PDF. For example, if you are wanting a Blue Streak ColorLab, and designed using the Model 595 to see the color scheme, let the Customer Service Rep know you designed for the Blue Streak.
- Next, select your size.
- Once you have finished your ColorLab design, be sure to click **Share and Save** to create and save the PDF that you will need to submit to Customer Service.

**Special Notes:**

- Be sure to note your size and width. Width is not available to select on the ColorLab application, so just provide that to the Customer Service Rep when ordering.
- If a leather color you desire is not included on the ColorLab Application, but is shown in the ColorLab Leather Colors PDF, be sure to indicate that when talking with a Riedell Customer Service Rep.

If you have any questions about ColorLab or need help ordering, please contact us at **800-698-6893** or email [customerservice@riedellskates.com](mailto:customerservice@riedellskates.com).
